Talk: Insights in MR – Guided Focused Ultrasound

SPEAKER

Dr Ali Sarem

Senior consultant at Insightec GmbH

SPEAKER

Vincent Beilvert

Country manager and business development for France, Belgium, and Africa

SPEAKER

Dr Cyril Ferrer

Trained translational bio-medical scientist in MRgFUS, Associate Director in Medical Affairs, EMEA at Insightec

ABSTRACT

MR-guided focused ultrasound (MRgFUS) provides an incisionless treatment option for tremor-dominant Parkinson's patients who do not respond to medications. Candidates for treatment must be Parkinsonian tremor patients 30 years or older.

During treatment, ultrasound waves heat and ablate the deep brain target with no surgical incisions. Treatment is guided by MR imaging for patient-specific planning, real-time temperature monitoring as well as immediate assessment of treatment outcome.

The result for many patients is immediate improvement of tremor with minimal complications.

AGENDA

- History & utilization
- Technology (Video incl. patient case)
- Clinical evidence (ET, PD)
- Outlook
- Discussion

Locations:

CHL*
Room: **R2A/R2B**
4, rue Ernest Barblé
L-1210 Luxembourg
